

Every year,

1.4 lakh Indians

undergo an amputation in their lower limbs due to diabetes, when they didn't have to.

Footcare's first big step is yet to be taken.

India has 45Cr + people with foot and ankle issues. Demand is massive. Solutions are fragmented. No brand leads.

The country's off on the wrong foot.

45Cr+

affected by injuries, wounds, and deformities

10Cr+

diabetics + high rates of arthritis, sports injuries, other foot conditions

90%

hospitals lack dedicated foot or wound care units

FootSecure, Built for every step ahead

- India's only phygital platform for foot and ankle care
- Combines physical centres and hospitals with digital tools for diagnosis, treatment, therapy and rehab

300+

conditions managed through structured clinical pathways

AI/ML based proprietary tools. Clinician backing. No missteps.

- Wound360 – Digital wound care platform with AI-supported tracking
- Foot360 – AI-powered tool for analysing the foot and providing custom insoles and footwear.
- Custom Therapeutic Footwear – Bespoke Medical-grade pedorthics made as per pedograms and 3D scans / 3D Printed foot lasts

Leading the charge. One step at a time.
